PROFESSIONAL SUMMARY

Full-Stack Developer and DevOps Engineer with experience building scalable MERN-stack applications, REST/GraphQL APIs, and containerized cloud deployments. Skilled in Node.js, React.js, Docker, Kubernetes, and CI/CD pipelines, with a track record of shipping production platforms serving real users. Open-source contributor (GSSoC 2026) and founder of a live food-tech platform (Khanaaval.com).

EDUCATION

Vishwakarma Institute of Technology, Pune

B.E. in Computer Engineering GPA: 8.84 / 10.0

Pune, India

Aug 2024 – Present

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, C++.
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Electron.js.
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, Socket.IO, WebRTC, BullMQ.
- **Databases:** MongoDB, Redis, Drizzle ORM, PostgreSQL.
- **DevOps & Cloud:** Docker, Kubernetes (K8s), CI/CD, GitHub Actions, AWS EC2, VPS
- **Security & Tools:** Git, GitHub, Postman, RBAC(Role-Based Access Control), JWT, OAuth
- **Core Concepts:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, System Design, MVC Architecture, Data Structures & Algorithms.

WORK EXPERIENCE

- Full-Stack Developer & DevOps — Blackangler Pvt. Limited 2026–Present
- Built scalable backend systems using Service/Repository architecture and REST APIs.
 - Deployed containerized applications using Docker, Nginx, SSL/TLS, and cloud infrastructure.
 - Implemented Redis caching and CI/CD pipelines with GitHub Actions.
 - Developed Enterprise Platform Suite featuring Lead Generation and Inventory Management platforms with scalable APIs and business workflow automation.

PROJECT

- **HealthShield** | [Website](#) | [Github](#) — MERN Stack, ZegoCloud, Razorpay
 - Developed a full-stack healthcare management platform that streamlines vaccination tracking, appointment scheduling, secure video consultations, and digital healthcare services, improving accessibility for patients and healthcare providers.
 - **Key Features:** JWT Authentication, RBAC, Vaccination Tracking, Appointment Scheduling, Video Consultations, Location-Based Center Discovery, Payment Integration, EHR, Notifications, and Admin Dashboard
- **Secure Scan** | *Open Source* | [Github](#) — Electron.js, Node.js, TruffleHog, JavaScript
 - Built a desktop security tool that scans GitHub repositories to detect exposed API keys, tokens, and sensitive secrets, with automated remediation to prevent credential leaks.
 - **Key Features:** GitHub Repository Scanning, Secret Detection, Automated Remediation, Auto-Patching, Multi-Language Support, Security Reporting Dashboard, and One-Click Vulnerability Fixes.
- **Khanaaval.com** | [Website](#) | [Github](#) — MERN Stack, GraphQL, REST APIs, Redis, Bullmq, Razorpay
 - Founded and developed Khanaaval.com, a scalable food-tech platform connecting students with verified mess providers through meal subscriptions and daily ordering, serving 300+ daily users.
 - **Key Features:** Meal Subscriptions & Daily Ordering, Cloud Kitchen & Mess Management, QR Check-ins, Real-Time Menu Updates, Background Job Processing (BullMQ), Role-Based Dashboards, Revenue Analytics, JWT Auth, GraphQL APIs, and Redis Caching

ACHIEVEMENTS & EXTRA-CURRICULARS

- GSSoC'26 Contributor — Contributed to open-source projects through GirlScript Summer of Code 2026
- Web Development Coordinator, CSA Club, VIT Pune — Led web development initiatives, mentored junior developers, and managed end-to-end delivery of club technology projects.
